Vision
A compassionate profession that impacts healthcare

Mission
Strengthen medical professionalism to benefit the community

Objectives
1. To promote and advance public health-related and health education in Singapore
2. To develop interest in, increase awareness of and address health and health-related issues and/or needs through activities, campaigns and events targeted to benefit the needy and the general public
3. To relieve the distress and hardship and promote the welfare of members of the public, including members of the medical profession in Singapore and in furtherance thereof to do all or any of the following:
   - To provide, create, administer grant, sponsor and/or jointly sponsor donations, awards, sponsorships, scholarships, bursaries or any other kind of financial assistance of all and any kind to needy students in the medical field of education
   - To provide funding, sponsor, jointly sponsor and/or run projects, programmes and/or activities related to the medical field for needy students pursuing studies in the same field
   - To provide funding, sponsor and/or jointly sponsor medical research and public health projects

Corporate Governance and Reserves Policy

A strong and experienced board of directors will be able to best serve the objectives and interests of SMACF. Our board of directors comprises individuals from diverse professional backgrounds who possess immense experience in governing charities and a keen interest in healthcare and medical education. The heterogeneity of the Board allows for robust discussion and a diversity of ideas, which would further advance the objectives and interests of SMACF. No member of the Board is paid for services to the SMACF in that capacity.

CONFLICT OF INTEREST AND RELATED PARTY TRANSACTIONS
All board members and key management personnel of SMACF are required to read and understand the policy on conflicts of interest that are in place, and make full disclosure of any interests, relationships and holdings that could potentially result in a conflict of interest. When a situation with a conflict of interest arises, the conflicted party shall abstain from participating in the discussion and decision-making of that matter.

RESERVES POLICY
In addition to reviewing our reserves on an ongoing basis, SMACF intends to maintain a sufficient level of reserves to allow it to continue its work and perform continuing obligations even when donations dry up during unforeseen circumstances. Our reserves will be reviewed on an ongoing basis, while new and current programmes develop and proceed.

SMACF Board of Directors and Committees

SMACF is managed by a Board of Directors, which also acts as the Programme and Fundraising Committees.

AUDIT COMMITTEE MEMBERS

Chairperson’s Message

As doctors, we have been given a unique honour and privilege: to care, heal and cure. We have benefited from a long tradition passed down from the senior colleagues who taught and mentored us. Let us give back to society and inspire the next generation of the profession. SMA Charity Fund (SMACF) turns four in 2017. As a young charity, we have been working hard to anchor our social causes, aiming to contribute to better healthcare, and to create work with a social impact that ripples through society. To achieve this, our focus has been to build and strengthen the cornerstone of our healthcare system – our young doctors.

The future of healthcare depends on the medical students of today. At SMACF, we remain focused on the issues affecting them in their earlier years. One of the key concerns is their rising tuition fees and, concurrently, the growing debt among students. Apart from tuition fees, many other variable costs such as that of medical textbooks and instruments, together with transportation and daily living costs, make up the true cost of a medical education.

Medical students today face a great financial burden. In Singapore, tuition fees for a medical degree range from $127,000 to $172,200 for a Singapore citizen (after government subsidy) over five years, four times more than the tuition fee for a non-medical degree. Tuition fees have also increased by 50% over the last decade. Given the rising cost of living, the financial load of medical students is multiplied, especially for those from a lower socio-economic strata. Out of necessity, these students often seek out part-time employment to help the family or reduce their study debt, at the cost of their medical studies. According to a survey carried out in 2014, many students are involved in some form of part-time work during their medical school years and 37% of the students said this part-time work had negatively impacted their medical studies. This is of great concern to us. To nurture future medical professionals, it is important that our medical students of today are able to focus on their studies without undue financial burden.

SMACF has been working with the three medical schools to ensure that help is given to students where it is most needed. Over the last three years, the percentage of our bursary recipients from families with a per capita income of less than $1,000 has increased from 11% to 13%. The most significant change was seen in the group with a per capita income of $1,000 to $1,499, which has grown from 13% to 19% of our total award recipients. Although these students also receive various financial awards, any assistance often goes straight into paying their high tuition fees, with little left for living expenses. The additional amount these students receive through our SMA Medical Students’ Assistance Fund (SMA-MSAF) bursary helps them to go the distance.

Our funds go directly to our cause. Of the amount we raise, 70% goes into helping our medical students. We want to see them develop into future generations of medical doctors who have both the ‘hardware’ and ‘heartware’, and who will impact healthcare for the benefit of all. But we can only achieve what we set out to do with your unfailing support. It is of concern that yearly donations to SMACF are decreasing. The next three years will be a critical phase for us: funds held in NUS Yong Loo Lin School of Medicine (NUS Medicine) for the SMA-MSAF bursary are projected to be depleted by financial year 2020. At the current bursary approval rate, the disbursement from the fund is about $150,000 each year. This means that SMACF requires a net operating surplus of at least $150,000 each year to ensure that it can continue to meet the needs of eligible medical students.

We appreciate your support over the past years and continue to seek your help for the challenges ahead. The future of healthcare in Singapore depends on our medical students today. As one united profession and community, we can shape the future of the medical profession through what we give today.

Prof Wong Tien Yin
Chairperson
Board of Directors

“We make a living by what we get, but we make a life by what we give.”

Winston Churchill
Since 2014, the SMA-MSAF, under SMACF, has disbursed more than $650,000 in financial bursaries to medical students from needy families. The bursary quantum of $5,000 has increased by 39% since we first started it in 2007. Over the years, the number of awards given out has also increased as we seek to close the gap between the number of bursaries available through the medical schools and the number of eligible applicants. In 2016, the increase in the number of awards was 26%, at the same quantum of $5,000, in response to the increased requests from medical students of Duke-NUS Medical School (Duke-NUS) and Lee Kong Chian School of Medicine (LKCMedicine).

I really regret missing classes in my first few years of medical school. I sincerely hope that this bursary will continue to benefit more people like me, so that we can focus on what is important — becoming better doctors.

Dr Tan Si Heng
A bursary recipient during her undergraduate days, who received a financial grant from SMACF for her research project presentation at an international conference in 2014.
2. PROVIDING EQUAL LEARNING OPPORTUNITIES — SUPPORTING LEARNING EXPOSURE

SMACF provides partial financial grants for needy medical students pursuing medical knowledge and training. This grant aims to provide them the opportunity to gain international exposure and experience in the field of medicine through involvement in international medical conferences or approved elective programmes.

Ms Tey Min Li, a Year 3 student at NUS Medicine, benefitted from the partial support received from SMACF in academic year (AY) 2016/17, which gave her the opportunity to undertake her research elective programme at Harvard Medical School and Boston Children’s Hospital.

3. NURTURING A CARING PROFESSION — RECOGNISING VOLUNTEERISM

Every year, about 5% of SMACF’s operating budget go into supporting local community projects carried out by students from the three medical schools. 700 volunteers came together for these projects, from public health screening to working with palliative patients and migrant workers, clocking more than 5,000 hours altogether.

These projects also provide valuable exposure for our medical students, as they can experience what medical doctors face in their practice and learn about medicine in totality. Most of all, this programme allows us to develop the ‘heartware’ of the future medical profession during the early formative years of these medical students.

4. ACKNOWLEDGING THE BUILDERS OF THE FUTURE MEDICAL PROFESSION — RECOGNISING MENTORSHIP

During his SMA Lecture in 1997, the late Dr Wong Heck Sing, past SMA Honorary Member, wisely said that we need doctors who are able to inspire by example and behaviour to bring out the best values in students. The Wong Hock Boon-SMACF Outstanding Mentor Award was started in 2012 to recognise the works of mentors and to let medical students show their gratitude to their mentors for their guidance. In 2016, a total of ten awards were given out.

“Project Legacy was my first exposure to palliative care. It is a meaningful project, as it allows volunteers to interact with patients and their loved ones in a different setting, and to see a different side of healthcare.

— Zelia
Volunteer for Project Legacy, Cycle 5 (2016)

As clinician-scientists, Prof Motomi Osato and Dr Takayoshi Matsumura are passionate about improving patient care through research. (They) always motivate their PhD students in the laboratory to think about how our research can be translated into practice.

— Tan Yong Chuan
MBBS Class of 2018, NUS Medicine

Thank you for helping me take a step closer to achieving my goal of becoming a good doctor and for inspiring me to give back to the community!

— Teo Qi Tian
Bursary recipient AY 2015/16, NUS Medicine

In addition to community service projects, the featured articles in SMA News’ From the Heart column continue to inspire members of the profession to volunteer their time and expertise and make a difference to the lives of the less privileged.
Key Financial Highlights

In 2016, SMACF increased its charitable activities in our continuing effort to build a compassionate medical profession. Our total donations (tax-deductible and non-tax-deductible) amounted to $191,440. Including the disbursement from grants, the total receipts were $241,775, a decrease of 22% from financial year (FY) 2015. The decline in total receipts was primarily due to a lower donation income compared to the previous year. However, the number of donations received in FY 2016 increased as compared to FY 2015, from 138 to 175. This can be attributed to an increase in the number of donors joining our regular donation programme, giving on a monthly basis.

Total expenditure increased by approximately 40%, as we gave out more bursary awards to students from Duke-NUS and LKCMedicine following the pledged support received from the Care and Share grant. Overall, our direct charitable activities increased almost 130% as compared to FY 2015, as we gave out more bursaries to medical students from these two medical schools. The Care and Share grant is not fully reflected in FY 2016 and the remaining amount will be disbursed to SMACF in tranches from 2017 till 2018. The timing of disbursement of the grant is not expected to have a significant impact on our cash flow.

Taking into account our bursary expenses of $150,000 for students in NUS Medicine through the funds previously raised by SMA and currently held and disbursed by NUS, SMACF will have to ensure that it is able to raise sufficient funds to meet the ongoing needs of the SMA-MSAF bursary for all three medical schools, which currently stands at $265,000 annually.

With the projected increase in the number of bursary awards to be disbursed by SMACF in the coming years — in line with the projected number of needy medical students — SMACF will actively raise funds to meet the finances needed to run its charitable activities.

---

I know how much SMACF’s work matters to medical students who may not be poor enough to qualify for full financial support, and yet are having problems making ends meet.

Looking Ahead

In 2013, we embarked on this journey toward building a compassionate medical profession. It has been a good three years since the inception of SMACF. We are not resting on our laurels and will strive to achieve more in order to contribute to better healthcare to benefit the patient while maintaining good corporate governance.

**COST OF GENERATING FUNDS**
The costs directly incurred by SMACF in generating income to carry out its charitable objectives, including personnel and administrative costs to support these activities.

175
gifts to SMA Charity Fund in FY 2016

95% of the gifts transacted were under $5,000 in value – these added up to impact the lives of 8 needy medical students

407
gifts in total since FY 2014

29% increase in the number of awards given out in FY 2016, as compared to previous years

Building the value of compassion

5% of our operating budget supports meaningful community service projects by medical students. 700 volunteers were involved in the various projects undertaken by our medical students, benefiting not just the students but also the individuals in the society.

Your support means a lot to the medical students today

“I am moved that there are people who have yet to know me but are willing to undertake such a heartwarming gesture that will greatly aid me in my life.”

A grateful bursary award recipient
LKCMedicine, AY 2016/17

Keeping the spirit of collegiality alive in the medical profession

“I believe this circle of kindness will benefit all of us. As a beneficiary of the generosity of past generations of doctors, it is only right for me to support medical students in future.”

Ms Tey Min Li
MBBS Class of 2018, NUS Medicine

Every donation counts! Every dollar you give will go far in achieving our vision.

Your gift can be made online at www.giving.sg/smacf. Alternatively, you can write a cheque payable to ‘SMA Charity Fund’ and mail it to the Singapore Medical Association, at 2 College Road, Alumni Medical Centre Level 2, Singapore 169850 (Attn: SMA Charity Fund).
