Prevalence of glucose intolerance, and associated antenatal and historical risk factors among Malaysian women with a history of gestational diabetes mellitus

Chew WF, Rokiah P, Chan SP, Chee SS, Lee LF, Chan YM

On page 815, Methods section, paragraph 2, lines 9–11, the correct sentence should be, “Therefore, the formula used for this study should be \( n = \frac{1.96^2 \times (0.126 \times 0.874)}{0.05^2} \), and the sample size needed was 169.”
