

**Khoo Teck Puat Hospital (KTPH)** is a 590-bed general and acute care hospital that serves more than 700,000 people living in the northern sector of Singapore. KTPH combines medical expertise with high standards of personalised care, set within a healing environment, to provide care that is good enough for our own loved ones.

The 428-bed **Yishun Community Hospital (YCH)** is Singapore's largest community hospital to provide intermediate care for recuperating patients who do not require the intensive care services of an acute care hospital. It focuses on helping patients recover and regain their health and daily functions through therapy and education.

There are many valued opportunities for you to grow with us. Take up one of these roles to redefine care with us.
